Important Advice - Helpful Tips to Prevent Damage

Our Leisure Home Insurance Policy has been designed for owners of Leisure Homes, Leisure Caravans and Holiday Lodges to protect **you** against the risk of things happening suddenly which **you** could have not have expected such as fire, theft, **accidental damage**, flood and storm. It is not designed to protect **you** against losses that arise due to poor maintenance, manufacturing defects, or a gradual deterioration of **your leisure home**.

It is important that **you** read this **policy** in full, along with the **policy schedule** as **we** want **you** to ensure that **you** are fully aware of the extent of **your** cover, as well as the terms and conditions which are applied to **your** cover. **We** also suggest that **you** keep these documents in a safe place.

Important Note on the below:

The information shown below as well as on pages 8-12 does not form part of **your policy** but provides **you** important advice **you** should be aware of to prevent damage and only contains examples of what appears within **your policy** wording.

Escape of Water

The cover **you** are provided for escape of water is designed to provide cover for damage to **your** property caused by water leaks. One of the largest risks of water damage occurs when **you** are away during the winter months (period between 1st November - 31st March, both days inclusive) when water pipes can freeze and burst, causing significant damage to **your home**.

It is important that **you** ensure **you** have taken steps to avoid this by keeping **your** central heating on low to ensure that **your** pipes do not freeze. If **you** decide to turn **your** central heating off whilst **you** are away, then **you** should drain all the water from **your** central heating system and all the water pipes to sinks, baths, and showers etc and switch the water off at the mains also. (Please see page 22 for more details about leaving **your leisure home unoccupied**)

Claims can occur due to water penetrating the seals around **your** bath, showers, sinks and worksurfaces. **You** should regularly check these seals and repair accordingly with an appropriate silicon seal to ensure water does not escape into walls and floors. At the same time **you** should also check for cracks in any grouting around tiles, and repair accordingly.

Many **claims** can also be as a result of connections to washing machines, sinks, dishwashers, radiators and boilers becoming loose or dislodged. It is recommended that **you** take some time to periodically check in cupboards and under radiators to see if the pipes or radiators are weeping, as this may well be the start of more water escaping shortly, and **you** should rectify accordingly before further damage is caused.

Pipes that carry water often burst because they get worn out or corrode. If this happens, **we** will be able to pay for the damage that has been caused by the water escaping but will not pay for the repair to the pipe itself. Don't wait for the pipe to cause damage to **your home** and its **contents**, get the pipe repaired before **you** need to make a **claim**.

Important Advice - Helpful Tips to Prevent Damage

Draining Down your Water System for Winter Unoccupancy

If **you** plan to leave **your leisure home**, leisure caravan or holiday lodge empty for an extended period of the winter, and it is not possible to leave the heating on during this time, then **you** are required to drain down the entire system as a precaution to prevent freezing and any potential damage that may occur. If **your leisure home** has a sealed heating system containing antifreeze then this does not need to be drained down but antifreeze levels must be checked prior to the property being left unoccupied. The hot and cold water system of a combi boiler should be drained as follows:

- Turn off and/or extinguish **your** water heater/boiler.
- Turn off the mains water supply to **your** property both internally and externally.
- All water tanks must be emptied by leaving both hot and cold kitchen taps fully open and toilets flushed until water stops coming out, this must be done throughout the property.
- Run all the taps in the property and flush all toilets until water stops coming out.
- If **you** have a hot water cylinder, empty it by opening the drain-cock at its base and attach a hosepipe to the drain-cock and run the water into a drain or bucket.
- Empty the rising main, and any low pipework if applicable, by opening their drain-cocks.
- Put salt into the toilet pans to prevent water in the trap from freezing.

In the winter (1st of November to 31st of March), when your home is left without an occupant for more than 48 hours, you must isolate the mains water supply to the leisure home and outbuildings by firstly turning off the mains water supply at the first available external point of entry to the leisure home and secondly turning off the water supply at the internal stopcock.

(Please see page 22 for the 'Leaving Your Leisure Home Unoccupied Condition' this contains the full details of what you need to do when leaving your property unoccupied).

Fire

Most house fires start within the kitchen area and many are caused by faulty electrical appliances or even unattended cooking pans and equipment – particularly frying and chip pans. In addition, candles, cigarettes, electric blankets and overloaded plug sockets, bare and uninsulated wires or old electrical appliances cause a significant fire risk.

We suggest that **you** bear these risks in mind and take all the necessary precautions to ensure the safety of everyone within **your leisure home**. It is recommended that **you** have a fully working smoke detector installed within **your leisure home**, and perhaps **you** should also consider a fire blanket within the kitchen.

Important Advice - Helpful Tips to Prevent Damage

Flood

If water has entered or is at risk of entering **your leisure home** due to flood, it is recommended that **you** should secure **your leisure home**, and move **your valuables** and essentials to an elevated place such as on work surfaces and on tables to minimise damage. **We** also suggest that **you** turn off all the utilities like power, water and gas supplies at their main source and disconnect any electrical appliances and place the plugs on-top of the appliances rather than on the floor.

Impact of a Motor Vehicle

If **your leisure home** or fence is damaged as a result of impact of a vehicle, make sure that **you** obtain their name, address and telephone number as well as the registration number of the vehicle that causes the damage. If **you** can obtain their insurance details at the time this would also be very useful. This information will be required by **us**, to help recover any payments made under **your policy** from the person who was responsible. Also, if anyone witnessed the impact, obtain their details too.

Maintenance of External Walls

Your leisure home should be well maintained externally to ensure that water does not penetrate the outer walls which could cause damage, including damp inside **your leisure home**. Below are some useful tips for the upkeep of some of the most common leisure home external wall finishes found. However, it is not an exhaustive list, and **you** should always refer to **your** home manufacturers external maintenance recommendations for **your** home.

• **Vinyl Cladding**

- In most cases normal rainfall is sufficient to keep it clean, but if **your** vinyl cladding should need cleaning, an occasional wash with clean water using a garden hose (not a pressure washer), with a soft bristled brush is ideal for this purpose.
- Ensure that all cladding is secure to ensure that it does not get damaged in high winds or allow water ingress.

• **Aluminium Cladding**

- To keep the paint work looking its best, wash regularly with water and mild soap, rinse off with clean water and then dry the cladding with a clean wash leather.
- An occasional polish with a good quality wax polish will maintain a high gloss.
- Ensure that all cladding is secure to ensure that it does not get damaged in high winds or allow water ingress.

• **CanExcel Cladding**

- If **your** home is clad with CanExcel cladding, **you** should regularly check the cladding to ensure that it is securely fitted to **your** home to prevent damage caused by high winds or allow water ingress. Should **you** find any loose-fitting sections, **you** get contact a specialist contractor to re-fit this section of the external cladding.
- **You** should also check for loose or cracked caulking between joins of the CanExcel cladding and also joins between walls and windows and doors and reseal with a suitable sealant.
- **You** should not use a jet-washer to clean the external walls of a CanExcel clad home.

Important Advice - Helpful Tips to Prevent Damage

- **Woodstain (Log Clad Homes)**

- The exterior of **your** log clad home has been treated with a high-performance wood finish system to protect **your** home from the elements. To maintain this protection, the maintenance of **your** home should include:
- Re-coating. As part of your maintenance plan and dependent on conditions, particularly on coastal or exposed locations, **your** home will require re-coating to maintain the quality finish it had when first manufactured – the timescale can vary considerably based on the above criteria; for this reason manufacturers recommend that **you** inspect the cladding annually and repair any area of breakdown. Early maintenance, sooner rather than later, will ensure that the timber is always fully protected and greatly extend the look and appearance of the timber cladding.
- Resealing any cracked or loose caulk with a suitable sealant.
- Ensure that all cladding is secure to ensure that it does not get damaged in high-winds or allow water ingress.
- **You** should not use a jet-washer to clean the outside of **your** home.

- **Exterior Textured Coating (such as Resitex or Stucco)**

The exterior of **your** home has been rendered with an exterior grade high-build textured coating to protect it from the elements. In order to maintain this protection leading manufacturers recommend:

- Regular inspection of the exterior walls to identify any fine cracks that may have appeared, paying particular attention to the junction between any window or door frames, the bottom 'rub-rails' meets the exterior wall corner cornices and box bays. These cracks should be filled by brushing in some of the exterior grade high build textured coating that is supplied by **your** manufacturer.
- To maintain the effectiveness of the exterior textured coating, manufacturers recommend the application of an exterior grade emulsion paint/colourwash (such as Resifine) every two to three years, dependent on conditions and locality (such as coastal locations).
- If at any stage, bare timber or plywood sheathing becomes visible this should be treated with an emulsion-based primer (such as Resiprime) prior to being touched-up with textured coating (such as Resitex).
- **You** should not use a jet-washer to clean the external walls of **your** home.
- As **your** home is mainly made of timber, **you** should not use a masonry paint (such as Sandtex) to paint the external walls of **your** home. If in doubt please refer to the manufacturer of **your** home or speak to a specialist contractor.

Due to the many other finishes available on leisure homes in order to prevent any degradation to your home, all exterior upkeep must be followed as set out in your leisure home manufacturer instructions for external maintenance. If the exterior finish to your home is not covered by these useful tips, then we recommend you contact the manufacturer of your home to obtain expert advice.

Maintenance of External Windows and Doors

You should regularly check the seals between the window and door frames and the walls to ensure the exterior mastic/silicone joints are not cracked or perished and replace should this be evident.

Important Advice - Helpful Tips to Prevent Damage

Maintenance of Roof and Guttering Checks

You should regularly check the condition of **your leisure home** roof. If tiled, ensure the tiles have not moved, been displaced or damaged. In addition, **you** should also ensure that **your** gutters do not become blocked by moss, leaves etc. Some areas like flat roofs are difficult to inspect. If **you** cannot check them yourself, **we** recommend **you** employ a relevant expert to do this for **you**.

PLEASE Note: Under no circumstances should **you** walk on or place heavy objects on the roof. Do not tread or bear body weight on the roof structure during any inspection and clearing of guttering and air vents. If in doubt, please consult **your** holiday park prior to carrying out this process.

Maintenance of Internal Air Vents

The internal air vents to **your leisure home** should remain unobstructed at all times as they are designed to ensure that there is a continuous airflow throughout **your leisure home**. Blocking or obstructing these vents will create damp and condensation within **your leisure home**.

Maintenance of External Skirting to your Leisure Home

It is recommended that **you** ensure that there is plenty of ventilation to the underside of **your leisure home** and that any air-bricks to the skirt must not be covered and that there should be a free flow of air throughout the underside of the **leisure home**. There should also be a continuous gap between the drip rail of **your leisure home** and the skirt of no less than 25mm to ensure that damp does not get transferred from the ground and into the walls of **your leisure home**.

Important Advice - Helpful Tips to Prevent Damage

Storms

Leisure homes are designed and built to withstand damage by all but the most extreme weather conditions. Normal weather conditions should not cause damage to a **leisure home** which is well maintained. Damage to a poorly maintained **leisure home** is not covered by this **policy**. It is important therefore that **you** keep **your leisure home** in a good state of repair.

Subsidence and the Base of your Leisure Home

Subsidence damage is caused as a result of ground movement affecting **your** property.

Subsidence and other types of ground movement can be difficult and complex to repair. It is important that **you** tell **us** as soon as possible if **you** think **your leisure home** may be affected.

Please be aware that unless **your leisure home** is sited on **your own land** the drains below the base and the base itself is owned by and is the responsibility of the site owner who **you** should contact in the first instance if **you** have concerns about it.

On occasions movement to **your leisure home** may be caused by inadequate or deteriorating supports or jacks to the chassis so it is important to check **your leisure home** chassis and supports periodically. This can be done by viewing through the inspection hatches within the skirt of **your leisure home**. Do not go under the home yourself, if need be contact a professional.

Theft

Your leisure home and the property within it is more likely to be burgled if accessible entrances are not locked and secured. It is not recommended that **you** let anyone into **your leisure home** who **you** do not know, and it is not recommended to leave them unaccompanied at any time.

Garages, storage containers and outbuildings are also attractive to the opportunistic criminal as they are easier to break in to, and often contain valuable tools and **garden furniture**. Ensuring that these are locked and not leaving doors open and unattended is another important step to minimising the risk of theft.

Making sure your cover stays in place

We asked **you** a number of questions when **you** purchased **your policy** and it is important **you** tell **us** if any of these things change. In other words, **your** cover remaining intact may be conditional on **you** providing **us** the right information at the start of **your policy** and then letting **us** know if **your** circumstances change.

Your policy has a number of conditions. They can be found on Pages 18 - 22, 40, 49, and 53 which **you** must ensure **you** have read and comply with.

If **your policy schedule** states **New for Old**, the **buildings sum insured** in **your schedule** must represent: The value of a brand-new **leisure home** of the same make and model as **your** existing home plus all the associated costs of replacing the home. These costs include clearance of the damaged home and re-siting of the new home.

If the amount shown on **your schedule** represents less than 100 % of the **New for Old** value of **your buildings**, **we** will only be able to settle **claims** at a percentage **you** are insured for. For example, if the value of **your buildings** shown on **your schedule** only represents 80 % of the **New for Old** value then **we** will not pay more than 80 % of **your claims**.

If **your policy schedule** states **Market Value**, the **buildings sum insured** in **your schedule** must represent: The value of a replacement model of **your leisure home** taking into account any depreciation in value of **your** home due to the age of the home and wear and tear, plus all the associated costs of replacing the home. These costs include clearance of the damaged home and re-siting of the replacement home.

If the amount shown on **your schedule** represents less than 100 % of the **Market Value** of **your buildings**, **we** will only be able to settle **claims** at a percentage **you** are insured for. For example, if the value of **your buildings** shown on **your schedule** only represents 80 % of the **Market Value**, then **we** will not pay more than 80 % of **your claims**.

The value of your contents

The **sum insured** for **contents** in **your schedule** must represent:

The current cost as new (other than for clothes and household linen); For clothes and household linen the current cost as new less an appropriate allowance for wear and tear.

You must notify **us** as soon as possible when the value of **your contents** exceeds the amount shown in **your policy schedule**. If the amount shown on **your policy schedule** represents less than 100 % of the full value of **your contents** (the cost of replacing **your contents** as new), **we** will only be able to settle **claims** at the percentage **you** are insured for.

For example, if the value of **your contents** shown on **your schedule** only represents 80 % of the full value then **we** will not pay more than 80 % of **your claims**.

If the full value of **your contents** exceeds the amount shown in **your schedule** the cover under this **policy** will no longer meet **your** needs.
